

Table 2-8. Peripheral Pin Assignment

[illegible]

Configure BT USB, RWL, and BT to use the BTs connected to USB Serial UART and USB 2.0 Full-Speed UART. By default, USB Serial UART uses COM4, and USB 2.0 Full-Speed UART uses COM5.

The USB_2_ and USB_C_1_ if used with **ITMU** can be swapped by configuring The USB_2_ and USB_C_1_ according to **Customized Technical Parameters Manual**.

¹ By N. G. de Bruijn, J. van der Hoeven, and J. van der Hoeven, *Journal of Number Theory*, 1998, 74, 1-10.

^a G4332 and G4333 are the double clones for the EC mutant interface at C 343 for the conformational pull-up system recruited by the EC pathway. They cannot be configured as general-purpose GFPs within the EC function in this work.
